ABOUT THE WORK

Description: Layers of texture and flowing forms evoke water's quiet persistence—its ability to carve, carry, and transform. Suspended between movement and memory, the work traces the unseen paths water leaves behind, revealing the enduring shapes created by time and tide.

Inspiration: *The Shape Water Keeps* came from a moment at the beach when I realized that the ocean is never truly still. Its constant movement, shifting currents, and waves gradually reshape the shoreline, leaving behind patterns and textures that tell the story of their passage. This idea found its way into the artwork through layers of texture, raised surfaces, and flowing forms that echo the ocean's restless energy and the marks it leaves behind. I wanted the surface to suggest the way water moves, erodes, and transforms, capturing the beautiful paradox of a force that is always changing yet leaves something enduring in its wake.
